

# *Escape the Underworld*

One of Percy Jackson's toughest challenges was escaping the underworld and saving his mother. He did have one advantage though, pearls given to him by his father could help him escape at any time.

The team that finds the most pearls in the game today will win.

Team 1 and Team 2 will line up behind the set-up cones, in any order. On the "Go" command the first person in line will run out to the playing area and grab a spot. Some spots will have a pearl attached to the bottom. Each pearl will count as a point for the game. If the spot is empty, it is worth 0. The team with the most pearls wins the game and helps Percy, Grover, and Annabeth escape the underworld. The other group is trapped in the underworld FOREVER MWHAAAAHAHA.
